It is the space for the residents to socialize and unwind. To seek nirvana. To find inner peace.

Vann is where nature's beauty, fragrance and serenity will awaken your body, mind and soul. Come, indulge in 'the Vann of five senses'

Smell. The invigorating fragrance of blossoming flowers. The morning freshness.

Touch. The pearls of dew drops on leaves. The velvety softness of petals.

View. The mesmerising hues of beautiful and bountiful nature. Its purity.

Hear. The gentle rustling of leaves. The soft chirping of birds.

Taste. The sweetness of fruits. The nectar of pure living.

An architectural rendering of a modern apartment complex named 'Vann'. The image shows several tall, multi-story buildings with a warm, terracotta-colored facade and numerous balconies. The balconies are adorned with greenery and plants. The buildings are set against a backdrop of a lush, green landscape with various trees, including palm trees and flowering trees. A road with a few cars and pedestrians is visible in the foreground. The sky is blue with scattered white clouds. The overall scene is bright and sunny, suggesting a pleasant, serene environment.

Our desire to provide a green lifestyle that exceeds expectations on every level led us to create towers which are Vastu compliant. The apartments are well ventilated and spacious, emanating charm unlike any other; the open green terraces will make your summers mesmerizing. All the towers are of varying heights which make sure that they all get beautiful views throughout the year.

GREEN ARCH ENTRANCE

A state-of-the-art architectural marvel at the entrance of Vann, makes sure that vehicular and pedestrian movements are kept separate. It ensures pedestrians don't face the difficulty of navigating through heavy traffic or the commercialised areas.

FOREST TRAIL

As a deliberate strategy active greening was introduced in Vann. The spice garden which will house a number of herbs and spices; the Bonsai Club; and the 'Knowledge Walk' which will showcase various species of plants and trees with their characteristics prominently displayed, makes the walk at Vann a knowledge trove on all botanical issues. The mile long 'Trail' binds the whole project together. This is also, in a way, the essence of Vann.
